

100th Hama Bead Key Ring (or whatever)

Need:

- Hama Pegboard (square shape)
- Hama beads as chosen
- Ironing paper
- Iron

To Make:

- Place the beads on the pegboard in the format shown overleaf.
- When you have finished, place the ironing paper on top of the coaster and use a household iron to fuse the beads together to make a permanent design. (All you need is a few seconds - do not overheat the beads.)
- Allow a couple of minutes to cool and then remove the design from the pegboard and the coaster is ready for use.

Sectional Variations:

Rainbows: Can make the design but will need an adult to iron the beads

Brownies: Can make the design but will need an adult to iron the beads

Guides: Younger Guides may need to be supervised when using the iron
